

Setting up for course

File system, Setting up environment, GitHub

CS 22B, Spring 2026

Module 01: Review

Presented by Jessica Huynh-Westfall, Ph.D.

AGENDA

Working on your local
directory

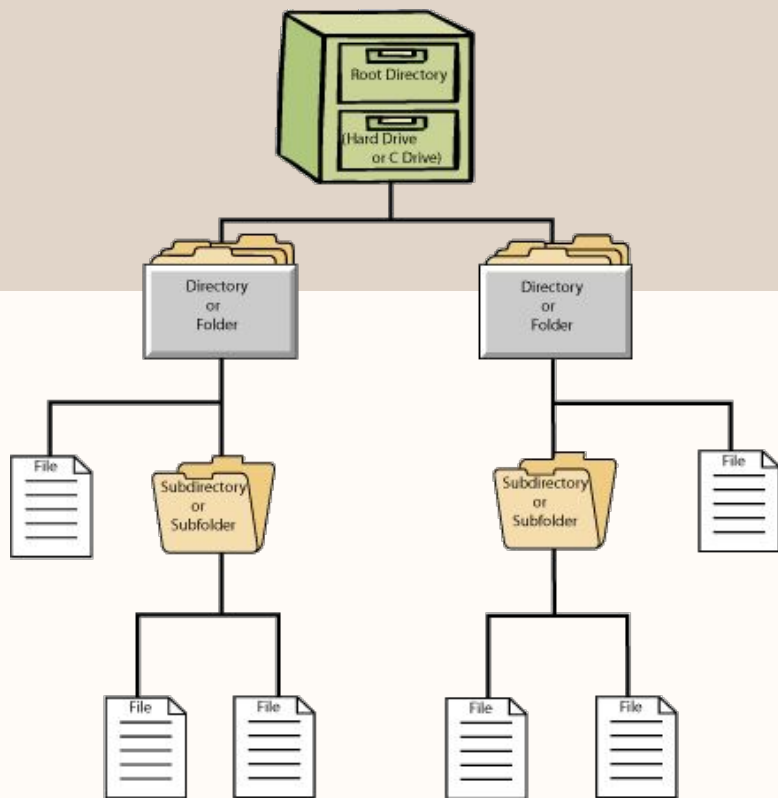

Python in terminal and IDE

GitHub repositories

What is a file system?

- Part of the operating system
- Tree structure containing files
- Every file has a path that is its location

Finding the location (path) in your local machine

Path is “route” to file or directory. The route depends on where you are, relative to target.

Absolute path – path from root directory, “/”

Relative path – path from current directory

- . (dot) is current directory

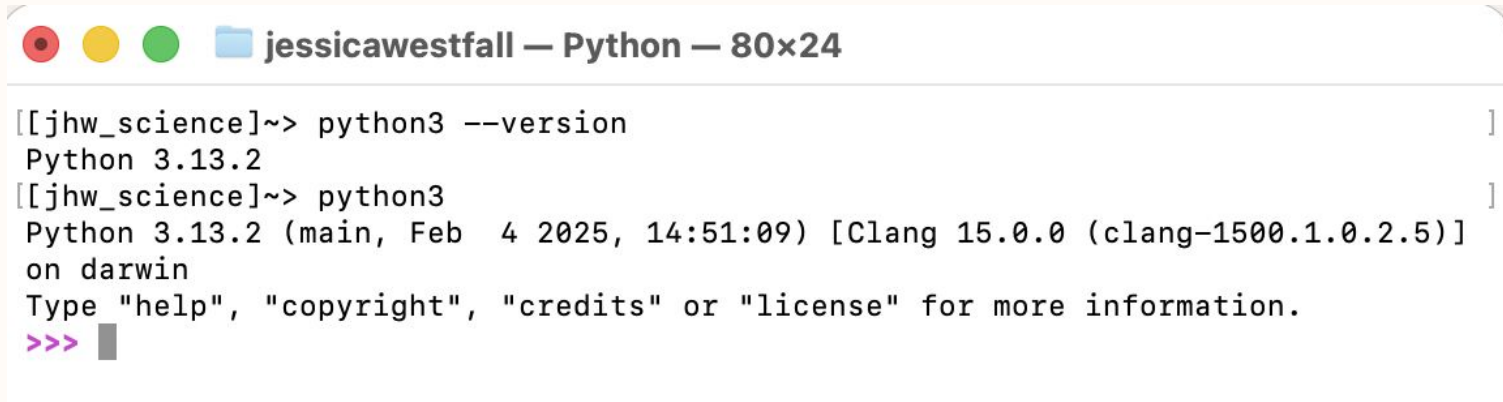

- .. (dot dot) is parent directory

Navigating to your workdir

05

From rootdir, create a folder for classwork

> pwd	←	Print working directory
> mkdir classwork	←	Make new directory
> cd classwork	←	Change directory

```
jessicawestfall — Python — 80x24

[[jhw_science]~> python3 --version
Python 3.13.2
[[jhw_science]~> python3
Python 3.13.2 (main, Feb  4 2025, 14:51:09) [Clang 15.0.0 (clang-1500.1.0.2.5)]
on darwin
Type "help", "copyright", "credits" or "license" for more information.
>>> █
```

Open up python

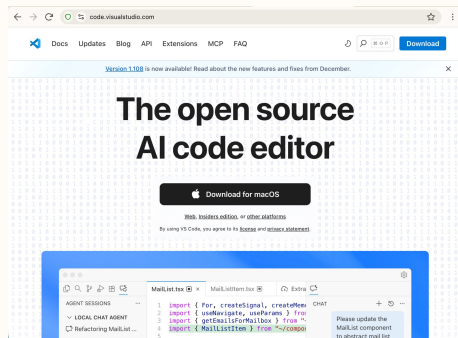

mac OS - terminal is linux

Window OS - command shell prompt

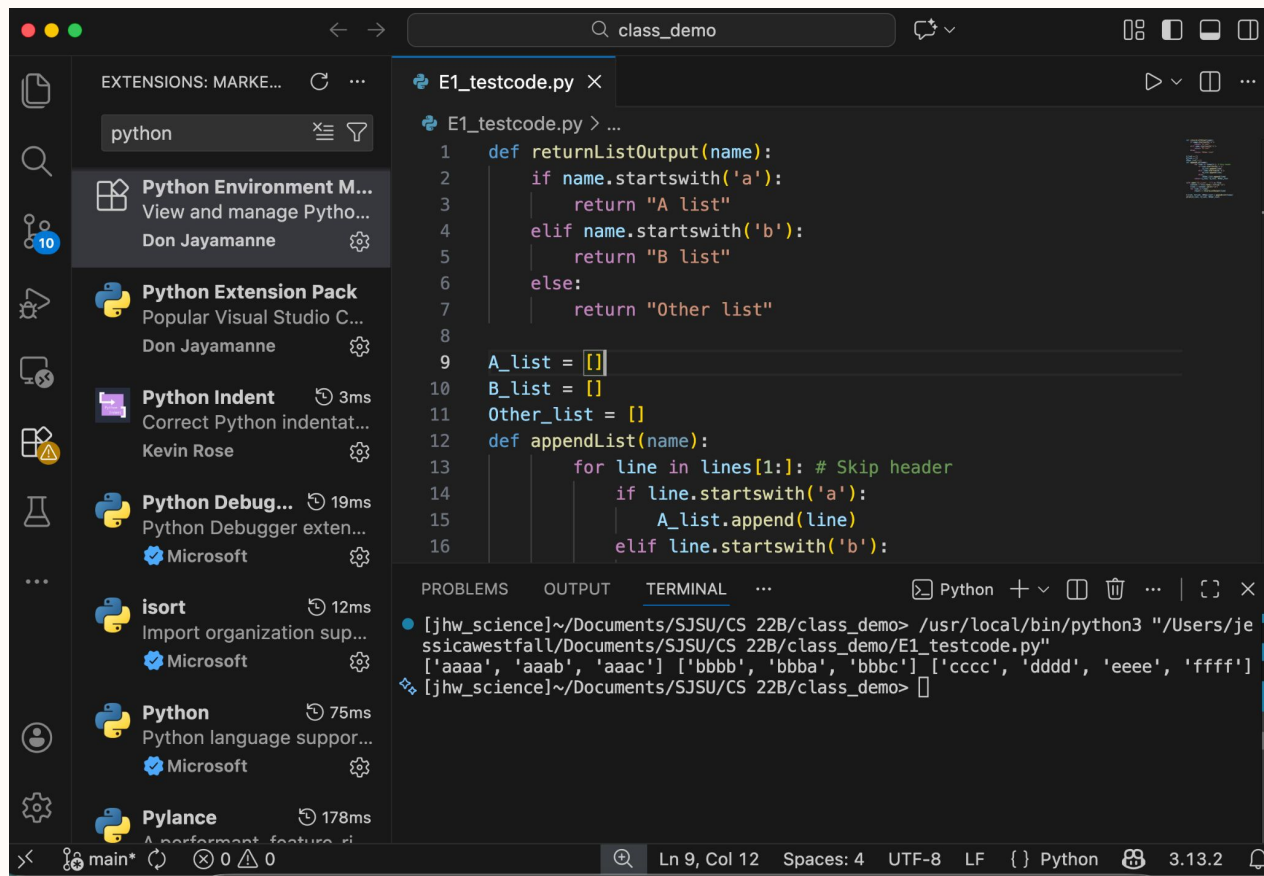

Run python in terminal

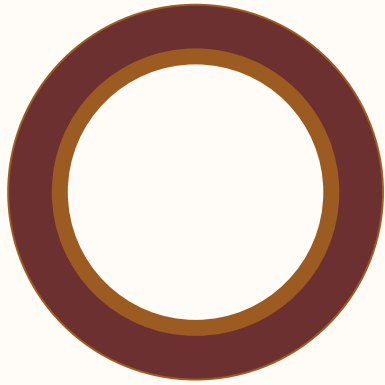

Coding in IDE

07

<http://code.visualstudio.com/>

Git and Github

version control

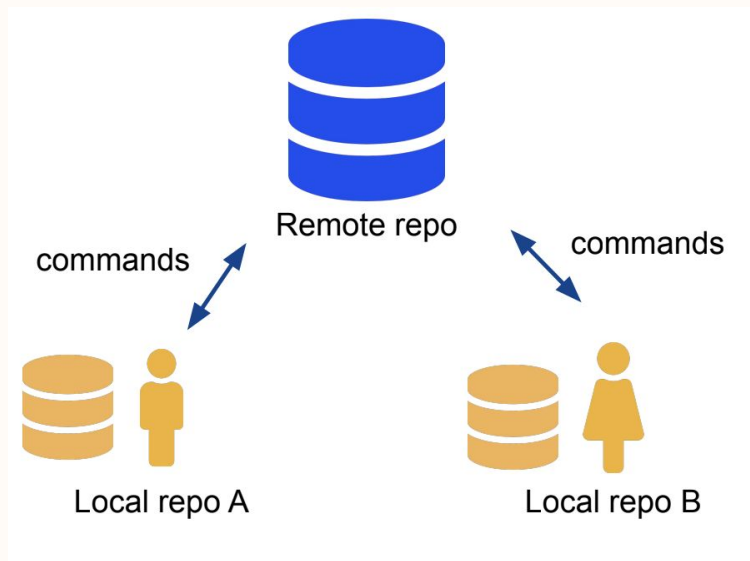

What is version control?

09

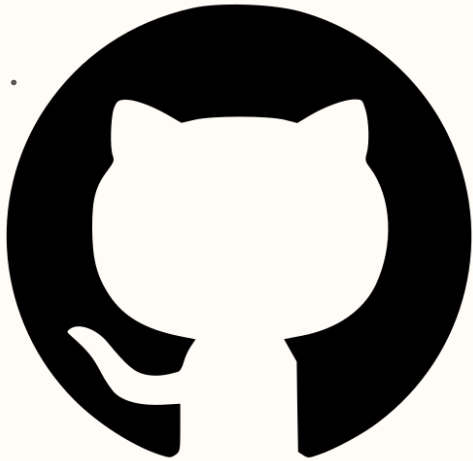

Version control is a system that records changes to a file or set of files over time so that you can recall specific versions later

- **Git** is one of the most common version control systems
- **GitHub** is a web-based service that provides hosting, utilizing the Git

Using GitHub to store files and code

10

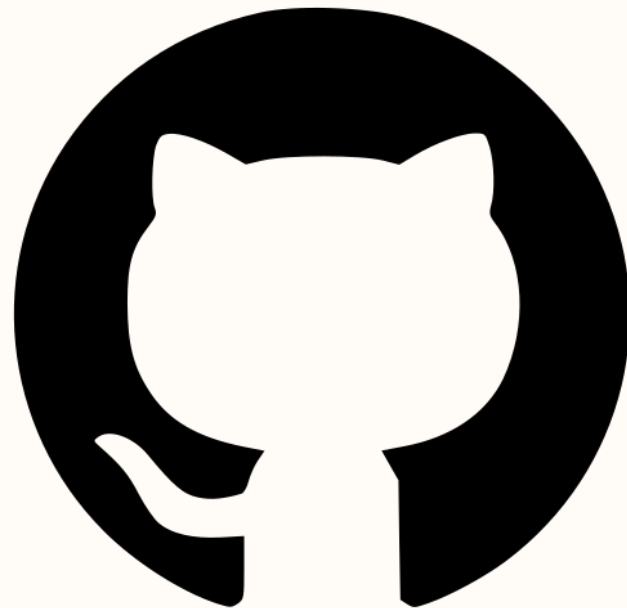

- Store, change, merge and collaborate on files or code
- Use **Git** for version control
 - Visibly tracking iterative changes
 - Team can look back at previous versions of the code to track changes and reverse if necessary
- Work with unlimited collaborators on project

Class GitHub repo

11

Git repo for class files

- Clone the repo
https://github.com/CS22B-IntroPython/CS22B_SP26_datafiles
- This repo will be use to download data files, collab notebooks, and other class related files.

Class datafiles on GitHub

12

To **clone** a GitHub repository

1. Go to the repository
https://github.com/CS22B-IntroPython/CS22B_SP26_datafiles
2. Navigate to your working directory
3. **git clone <git repo>**
4. Within the repo, use **git pull** to refresh repo
